2. INTRODUCTION

With the global internet penetration rate covering 63.2% of the world's population (Internet World Stats, 2021), we can expect consumers to judge a business by how its website looks. 2020 also saw 319 million new unique internet users (DataReportal, 2021). With these numbers, it's easy to see that making your website attractive, easy to use, and quick to load has a ton of benefits. [https://financesonline.com/web-design-trends/]

The purpose of dissemination is to make **Digital Technologies and Artificial Intelligence** (**AI**) **solutions** (**DiTArtIS**) a successful and sustainable project by raising the awareness and publicity of the project. In this context, the dissemination will focus on one hand the public, and on the other hand the scientific researchers. Thus, all the partners will have to work continuously in the field of dissemination.

The deliverable of this dissemination report provides an overview of the **DiTArtIS** website.

The **DiTArtIS** website is the place where official project information such as duration, strategy, partners, news&events, are provided for the public. It aims to facilitate the collaboration work within the **DiTArtIS** project consortium.

3. PROJECT WEBSITE

The **DiTArtIS** website serves as the most versatile information and communication tool, because on the one hand it provides the opportunity to provide information for a worldwide audience and enables a working platform for the project team members.

Couple of 2023 trends in web design are *Single-page design* and *Scrolly-telling* that allows the public to find almost everything about the ongoing project by scrolling the info on a single page. Our website was designed with regards to the newest trends since the **DiTArtIS** project is aiming for excellence in every possible way (technical and from social media point of view).

The website is also optimized for mobile devices since mobile searches make up for more than half of searches on Google platform

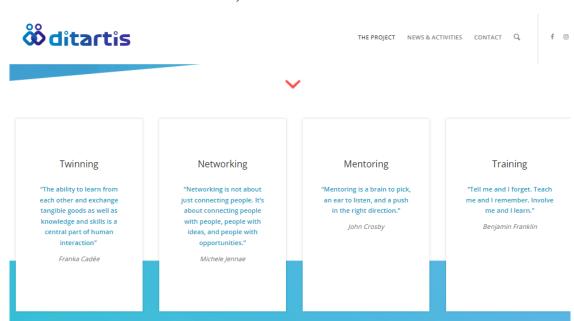

For a better understanding of the website the whole page was split into small pieces

a) General info

b) Synthetic info zone (the partners are linked through their logo to their website.

The research, mentorship and training are detailed in the next zones)

THE PROJECT NEWS & ACTIVITIES CONTACT Q f

Mentorship program

The goal of the mentorship program is to accelerate the personal and professional development of young researchers, inside and outside the consortium. This will be achieved by providing the young researchers with guidance, advice and feedback from mentors with more experience.

Target group 1: at least 18 young researchers coming from UTC and twinning partners interested in developing their career path.

Target group 2: at least 9 young researchers coming from other countries (including third countries) interested in international mobility in European countries.

Target group 3: highly skilled researchers from UTC and twinning partners (6 to 8 mentors) interested in supporting in guiding career development and/or integration of young researchers in the research teams.

The program

a short-term publication review program, designed to help a mentee with a specific article submission.

a short-term grant review program, designed to help a mentee with a specific grant submission.

a long-term program, which facilitates the establishment of longer-term mentor-mentee relationship to aid in career development.

Figure 1. DiTArtIS – website

The menu bar, situated at the top of the page, consists of 3 menu items: The **Project** (a brief explanations of the projects phases), **News & Events** (latest news for the large public and all the events that the **DiTArtIS** consortium will contribute) and of course **Contact** section (that will make the connection between the consortium and public through the **get in touch** zone).

Through the **DiTArtIS** website platform the consortium will improve the global visibility of the implicated European universities and industrial partners.
